Lockhart Introduces Food Grade Overbased Calcium Sulfonate

Lockhart Chemical Company has introduced Counter Rust™ CA-407, a NSF HX-1 and Kosher approved highly overbased calcium sulfonate, approval number 156268. Counter Rust CA-407 is an excellent grease feed for greases requiring approval for incidental food contact. It also provides excellent corrosion protection and is a good dispersant. Counter Rust CA-407 is available in drums, totes and bulk.

Lockhart Chemical Company is a manufacturer and global supplier of rust preventive additives, calcium, barium and sodium sulfonates, gelled calcium sulfonates, emulsifier packages and metal processing additives.
