Lexolube H1 Products Announcement

News Release from: Zschimmer & Schwarz, Milledgeville, GA
Date: June 18, 2018

The United States Food and Drug Administration (FDA) approved the Zschimmer & Schwarz factory in Milledgeville, GA to manufacture the “Lexolube FG-HX1” Synthetic Esters for use as a lubricant ingredient with incidental food contact. The FDA confirmed the chemical identity matches esters previously manufactured by INOLEX in Philadelphia, PA. All Lexolube FG-HX1 products will now be supplied directly from Z&S in Georgia.

The Lexolube FG-HX1 base fluids are designed for high performance H1 registered food processing lubricants and greases used in high temperature applications such as oven chain lubricants, gear lubricants and compressor oils.

The full range of Lexolube HX-1 products can be found in the NSF White Book (info.nsf.org/USDA/Listings.asp). Additionally, all are certified Kosher by the Atlanta Kashruth Commission and Halal by the American Halal Foundation.

Methods and uses of the Lexolube FG-HX1 products in food processing applications are covered under Canadian patent 2,726,988 and are patent pending in other countries.

For further information on the Lexolube product line, please contact Tyler Housel of Zschimmer & Schwarz at 215-847-6333 or thousel@lexolube.com.
