## **ExxonMobil Launches Dual Certified Product with HPM and Water Resistance Enhancement Tag**

Mobilgrease XHP™ 222 grease is now approved against the NLGI HPM certification! In addition to the HPM core certification, Mobilgrease XHP™ 222 also obtained the +WR tag for enhanced level of performance in the water resistance category.

The HPM Grease Certification Program ensures that all certified greases meet or exceed the High-Performance Multiuse grease specification requirements in the areas of mechanical stability, oil separation, water resistance, heat tolerance, corrosion resistance and load carry capacity. All licensed HPM brands undergo rigorous qualification testing using independent laboratories to ensure they meet the HPM performance requirements.

“We found the HPM approval process very easy and straight forward. One of the reasons we applied for the new NLGI HPM specification is the value of having an independent organization like NLGI review and approve the performance features of our high performance multiuse grease” stated Gary Dudley, Grease Technology Manager for ExxonMobil.
