## **Loadmaster Lubricants, LLC Launches Certified Product with HPM and Water Resistance Enhancement Tag**

Lithium Complex Grease is now approved against the NLGI HPM certification. In addition to the HPM core certification, Lithium Complex Grease also obtained the +WR tag for enhanced level of performance in the water resistance category.

The HPM Grease Certification Program ensures that all certified greases meet or exceed the High-Performance Multiuse grease specification requirements in the areas of mechanical stability, oil separation, water resistance, heat tolerance, corrosion resistance and load carry capacity. All licensed HPM brands undergo rigorous qualification testing using independent laboratories to ensure they meet the HPM performance requirements.

“Over a year of committed research and development has generated a new lubricant from Loadmaster that is HPM compliant. We are very excited about the roll out of the new product” stated Nicholas R. Rightmire, Ph.D., Research & Development Manager for Loadmaster Lubricants, LLC.
